Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Drawings

Figure 16 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the terminal" in line 21. There is insufficient antecedent basis for this limitation in the claim.

Claims 2-5 are rejected for being dependent on claim 1.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Namikawa et al. (US 5600203).

Regarding claim 6, Namikawa discloses a display device (see Fig 1-2 & Fig 5) comprising a face plate (23) which has an anode 24 and a fluorescent material 25 on an inner surface of thereof, a plurality of cathode lines (Y1- Yn) which extend in one direction are justaposed in a second direction which crosses the first direction (see Fig 5) and has electron emitting sources (emitter cones, shown in Fig 4a and Fig 4b), control electrodes (gate electrodes X1-Xn) which are constituted by arranging a plurality

Art Unit: 2879

of strip-like electrode elements which crosses the cathode lines in a non-contact state within a display region, extend in the second direction and are justaposed in the first direction, and having electron passing apertures (22) for allowing electrons from the electron emitting sources to pass therethrough toward the face substrate (23) and a back substrate (21), which has the control electrodes and the cathode lines disposed on an inner surface thereof and which faces the face substrate (23) with a given distance therebetween (see Fig 6); and a frame body (31) which is inserted between the face substrate and the back substrate and is arranged around the display region to maintain the given distance (lines 59 of column 7- lines 30 of column 8), wherein the cathode lines have extending ends that are terminated at positions outside the display region, and the frame body is superposed on the cathode line ends so that the ends and the anode are shielded from each other by the frame body (see Fig 6).

Allowable Subject Matter

Claims 1-5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 1, prior art of record neither shows nor suggests a display device comprising all the limitations of claim 1, particularly comprising the limitation of cathode lines have extending ends that are terminated outside the display region and inside the frame body and a shield member is inserted between the ends and the anode so as to ensure shielding between the ends and the anode.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karabi Guharay whose telephone number is (571) 272-2452. The examiner can normally be reached on Monday-Friday 8:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nimeshkumar D. Patel can be reached on (571) 272-2457. The fax phone number for the organization is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
